Education

Pimpri Chinchwad College of Engineering (PCCOE)

B.Tech in Computer Engineering – CGPA: 7.26/10

July 2022 – May 2026

Pune, Maharashtra, India

Pinnacle Academy

Higher Secondary Education (Science Stream) – GPA: 2.92/4

Aug 2018 – July 2020

Lagankhel, Lalitpur, Nepal

Bal Kalyan Vidhya Mandir (B.K.V.M)

Secondary Education (10th Grade) – GPA: 3.35/4

May 2018

Biratnagar, Morang, Nepal

Relevant Coursework

- Data Structures
- Algorithms
- Operating Systems
- Machine Learning
- Computer Networks
- Software Engineering
- Web Development
- DBMS
- Cloud Computing
- Natural Language Processing
- Neural Networks
- Large Language Models

Projects

Bill Splitter Web App | React, Flask, Express, Python, AWS DynamoDB, Tailwind CSS, Hypercorn 2025

- Built a full-stack web application to manage and split group expenses with real-time updates and debt resolution.
- Expanded Google OAuth for secure user authentication, along with group creation and expense tracking workflows.
- Merged notification system and dynamic charts to enhance user experience and provide financial insights.
- Utilized AWS DynamoDB for scalable data storage and Tailwind CSS with shadcn/ui for responsive, modern UI design.

Chat With Documents | Python, LangChain, FAISS, Flask 2025

- Built a document-based conversational AI system for PDF upload, semantic retrieval, and question answering.
- Executed a RAG pipeline using LangChain, FAISS, and Embeddings for context-aware response generation.
- Developed the Flask backend with PDF chunking, session management, and chat history support.

AI-Powered Log Analyzer | Python, Flask, React, Vite, Tailwind CSS 2024

- Built a full-stack platform to parse and analyze Apache server logs for suspicious access patterns.
- Applied regex-based preprocessing, ML based Anomaly Detector, and .log to .csv conversion for large-scale log analysis.
- Built as a Technical Seminar project and published a paper: [Publication Link](#)

FSM-Governed Agentic Booking Platform | Python, MongoDB, LLM, RAG, WhatsApp API 2025 – Present

- Built an FSM-based conversational booking agent for appointment flow control, package selection, and customer detail collection.
- Implemented OTP verification, field extraction, and booking-state management for transactional workflows.
- Integrated MongoDB persistence, WhatsApp API, and RAG-based query handling for real-time customer interaction.

Experience

Chatbot Developer Intern

Jun 2025 – Jul 2025

Need Technosoft Pvt. Ltd.

Biratnagar, Nepal

- Create chatbot features using Python and JavaScript for AI-driven web applications.
- Integrated chatbot workflows into React-based applications for customer interaction and support.
- Contributed to AI integration, testing, and deployment of chatbot functionalities.

Technical Skills

Languages: Python, C++, JavaScript, HTML/CSS, SQL, Java

Developer Tools: VS Code, Git, GitHub, Google Colab, Postman

Frameworks & Tech: Flask, LangChain, FAISS, React, Tailwind CSS, OpenCV, Scikit-learn, REST APIs

Databases & Cloud: AWS, MySQL, Render, Vercel, Netlify

Concepts: DSA, OOP, DBMS, OS, Networking, Cybersecurity, ML, Retrieval-Augmented Generation (RAG)

Extracurricular Achievements and Research Highlights

- Won the **Best Paper Award** at BabyConference for developing an Apache Log Analyzer using machine learning on synthetic log datasets.
- Conducted cybersecurity research using clustering and Random Forest models for attacker-resistant access control.
- Solved **500+ problems** on CodeSoft, HackerRank, and LeetCode, strengthening DSA and algorithmic thinking.
